Abstract: An abstract of up to 200 words should precede the text together with 5 or 6 keywords in alphabetical order to describe the content of the paper. Authors should take great care in preparing the abstract and not simply lift it from the main text. The abstract should describe the background and contribution of the manuscript and give a clear verbal description of the results and examples, and avoid citations whenever possible. Any acknowledgements will be printed at the end of the text.

Key words: keyword a; keyword b; keyword c; keyword d; keyword e

1   Title of the section

Text of the first section. **?** is a direct reference to a book with more than two authors. **?** is a direct reference to a journal article with more than two authors. Many papers were published in *Statistical Modelling* (see, e.g., **????**). Sometimes we also need to reference a book chapter (**?**).

1.1   Title of the subsection

1.1.1   Title of the subsubsection
